

Taiga

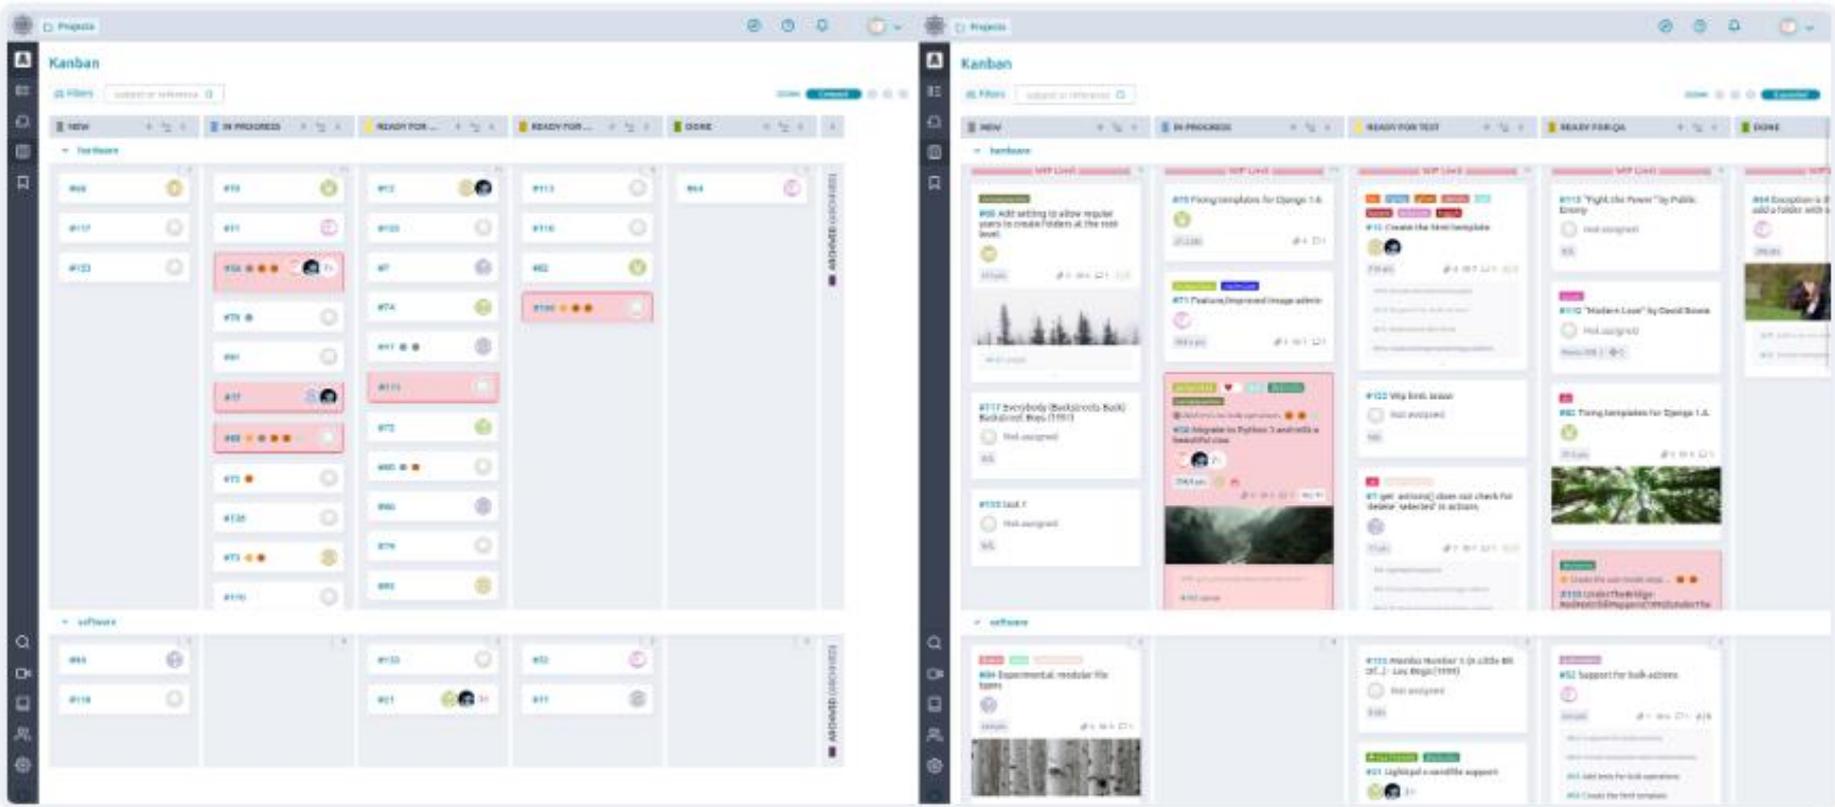

JoDee Baker, MPH

Kanban

- Customizable to fit workflow
 - Swim lanes (if you want)
 - Filtering and searching
 - Great visual management tool
-

The image shows a screenshot of a Kanban board interface. At the top, there is a header bar with a 'Projects' dropdown menu, a search icon, a help icon, a notification bell with a '10' badge, and a user profile icon. Below the header, the main area is titled 'Kanban'. On the left side, there is a sidebar with a 'Filters' section containing a search input field labeled 'subject or reference' and a 'ZOOM: Default' control. The main workspace is divided into four columns: 'NEW' (grey header), 'READY' (orange header), 'IN PROGRESS' (blue header), and 'READY FOR TEST' (green header). Each column has a count of '0' in the top right corner. The 'NEW' column contains a placeholder card with a title 'This could be a user story' and a description 'Create user stories here and change their status to track their progress.' The other columns are currently empty.

Terminology for Taiga

- Scrum
- Project
- Epic
